Mr. Swake Srisuchart

Mr. Amnuay Karnjanopas

History

Power Line Engineering Public Co., Ltd (PLE) was established on July 8th, 1988 by a group of engineers led by Mr. Swake Srisuchart and Mr. Amnuay Kanjanopas to engage in the services of design, engineering and installation of mechanical, electrical and plumbing systems (MEP) and civil construction for offices, hotels, complex and plaza buildings, hospitals and factories. To be in line with the company's expansion, the company was registered to be a public company on August 29th, 2002 and its shares were listed and floated in the Stock Exchange of Thailand on December 12th, 2002.

We, PLE as one of the leading construction companies in Thailand has undertaken successfully more than 590 projects including many notable projects of which each projects valuing in the range of THB 100 million to THB 8.0 billion in Thailand and overseas during the past years in line with the development of Thailand and the increased demand of various types of modern building construction. Our services have extended domestically and internationally through mainly civil construction and the installation of electrical system, telecommunication system, air conditioning system, plumbing & sanitary and fire protection system for both private and governmental sectors. The services can be brought together in any combination to provide integrated capability for customers. Apart from the mentioned core business, we also involved in Thailand's mega-projects as one of the main contractors. In order to cope with the demand of people's aspiration for the future modernized construction operations together with environmental care, we have continuously developed our construction teams and applied advanced technologies as well as the expansion of capital base. The continued improvement of our quality management system always meets the International Organization for Standardization (ISO).

Besides the mentioned core business, in order to increase its capability as a prominent general contractor and to generate more consistently recurred source of income in long term, PLE invested and acquired numbers of subsidiary companies in various businesses i.e. energy business, property development and shopping complex as well as invested internationally in construction business particularly in Middle East i.e. Qatar, where their construction business continues to expand substantially in the next 10 years. PLE had also registered the branches in Qatar and U.A.E together with joint venture of partners in the both countries.

We have a clear strategy to strengthen sustainable value for all stakeholders particularly our customers, whom are ensured to have the totally satisfactory services from our teams together with our supply chain working as unique to combine their ability to deliver customers' projects on time and to budget. For further information please visit the company's website: www.ple.co.th

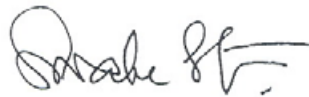

Message from the Board of Directors

Dear our customers and partners,

Since the inception in 1988 and transformation to be a public company, PLE was listed in the Stock Exchange of Thailand in 2002 through the present. Our company has been developing our services effectively in order to meet our customers' total satisfaction. The continuing improvement of services and performance has made us well regarded as one of the leading construction company in Thailand. We have excellent records of on time completion of various types of reputable and prominent construction projects in Thailand and overseas in the recent years. With sophisticated strategies supported by sufficient funds coupled with our strong management teams and competent staffs, our successfully continuing growth will be ensured respectively. We have clear policies to enhance the capability of staffs both management and technical skills together with implementing new technology for construction and engineering as well as retaining our effective corporate governance with business operational transparency, social responsibility and environmental care in order that all stakeholders obtain more sustainable value as well as we reach our ultimate accomplishment.

We are committed to responding the sustainability challenge along with the changing of demand from customers. By developing and implementing sustainability strategy covering our future operations, we are confident that our services will go beyond our customers' expectation and enable them to exceed their goals.

Swake Srisuchart
Chairman

Scope of Services & Engineering Capability

The Company offers the services of general civil construction and design, procurement and installation of Mechanical, Electrical and Plumbing (MEP) systems as general contractor.

1. General Civil Construction

- Infrastructure
- Building construction
- Road Work
- Factory Plant
- Water Treatment Plant
- Power Plant
- Irrigation System

2. Electrical and Communication Systems

- Power Substation
- Power Distribution
- Electrical Power Supply
- Lighting System
- Telephone System
- Public Address System- Master Antenna
- Security System
- Lightning Protection System
- Building Automation System
- Energy Management System
- Solar Power System

3. Telecommunication System

- Telephone Network System
- Data Communication System
- TDMA/CDMA Telephone System
- SDH/Fiber Optic Communication Network System
- Self – Support, Guyed Mast Tower Antenna

4. Air Conditioning and Ventilation Systems

- Air Conditioning System
- Ventilation System
- Refrigeration
- Clean Room
- Automatic Temperature and Humidity Control System
- Pressurized System
- Variable Air Volume (VAV) System
- District Cooling System

5. Plumbing, Sanitary and Fire Protection Systems

- Plumbing System
- Fire Alarm System
- Fire Pumps and Controller
- Fire Extinguishing Equipment
- FM200 System
- Water Treatment Plant System
- Waste Water and Sewage Treatment Plant
- Gas System
- Swimming Pool System

Quality Policy

1. High level executives will support resources and personnel sufficient for the quality policy to be carried out effectively.
2. The organization's personnel need to possess sufficient knowledge and ability to carry out their duties, through the company's training and human resources development, which are a mutual responsibility for the employees and the company.
3. Reviews of the agreement to ensure that the company understands and can respond to the customers' needs, as well as exceeding their needs when possible, punctual delivery of work, and not being penalized for tardiness.
4. Clearly specify the specifications and procedures to control the service process so that they correspond to the specifications in the documents to prevent customer complaints about services which did not correspond to the customers' needs.
5. When the reviews reveal that the product did not meet the required specifications, or on receipt of complaints from customers or those involved, the problem must be recorded and resolved. Thus, a correction action must be to prevent such a problem from arising again.
6. Internal reviews on all activities which involves quality system, in an appropriate time frame to ensured that the quality control system is effectively functioning
7. Collect, analyze, report and use collected information on quality.

Safety Policy

1. Workplace safety is the highest priority and responsibility in each employees' duties.
2. The company will promote and improve safe working conditions and environment.
3. The company will promote safety activities which will help to stimulate each employee's conscience, such as safety training, motivation, information, and competition, for example.
4. All supervisors will be good examples in leading, training, and motivating employees in safety measures.
5. All employees must at all times take into account their own safety as well as the safety of their colleagues and company property.
6. All employees must take care of proper hygiene and orderliness in working areas.
